

## AcoustiCone™ type 61BA

### Features

- Easy to install and uninstall
- One hole mounting
- Price saving acoustic solution
- No mineral fiber dust - only paper
- Unique and timeless design

### General description

In every building where people stay, work or live it is of paramount importance that the acoustic environment is good. Unfortunately it is not the case in many places. By installing of acoustic absorbers you can do something about it. The AcoustiCone™ is a very unique sound absorber made of aluminium and paper. Besides being a good sound absorber the AcoustiCone™ is also capable of distribute the sound in order to avoid echoes at high frequencies. Due to the size of the AcoustiCone™ it fits in between existing installations such as light armatures, ventilation shaft, fire warning equipment etcetera. That makes it very easy to install. The AcoustiCone™ can be painted in any colour.

### Main Specifications
